

Suede Labs AI

DISTRO.SUEDEAI.AI · MUSIC DISTRIBUTION · SPOTIFY, APPLE MUSIC AND 100+ DSPS

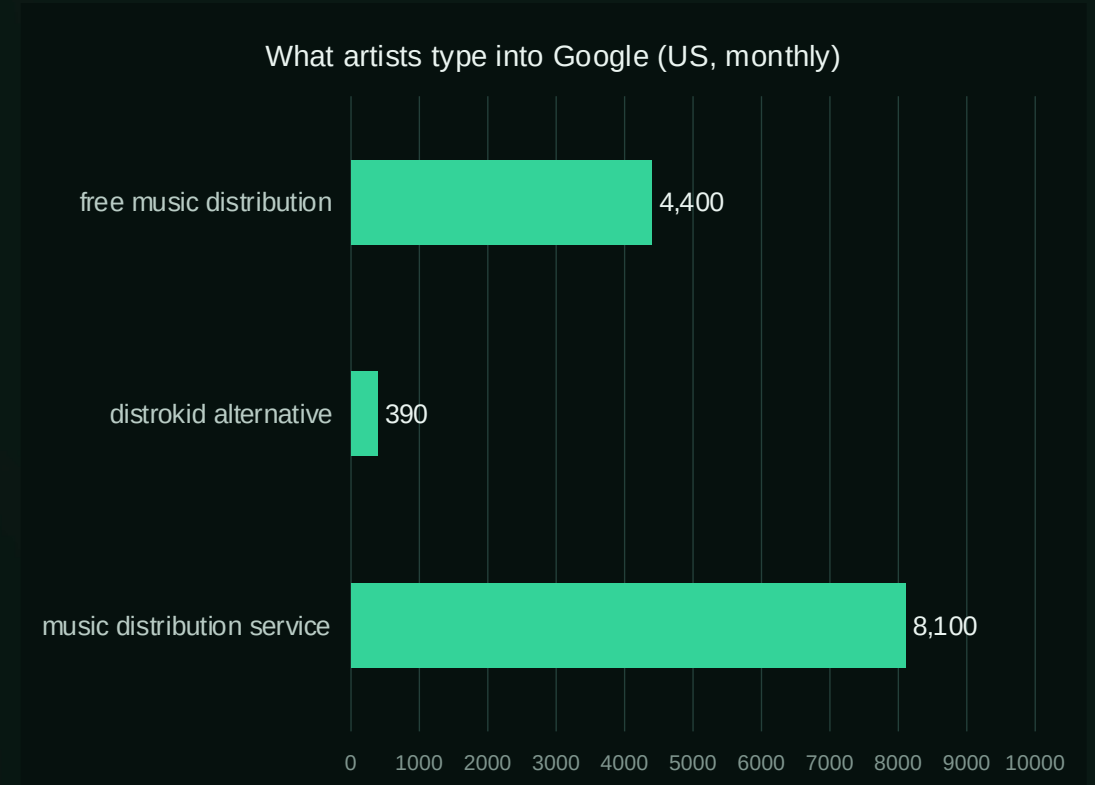

Independent music distribution, \$7.99 a month.

Release-readiness planning and delivery coordination to Spotify, Apple Music and 100+ stores through supported distribution partners, with royalty-aware splits. Own the master. Keep the royalties.

Searching for a way out of the distributor tax.

The big distributors bundle percentage cuts, per-release fees and upsells, and the artist still owns nothing more than a login. The search demand tells the story: people are looking for the service and looking for the alternative in the same breath.

- Percentage cuts on top of subscriptions
- Rights and splits handled nowhere, or by email
- Delivery checklists learned the hard way, release by release

Source: Keywords Everywhere and DataForSEO, pulled 2026-09-05

Distribution only, done properly, one flat price.

INTAKE

Release intake

Upload the release, the artwork and the metadata once. Suede checks readiness before anything ships.

DELIVERY

Delivery coordination

Spotify, Apple Music and 100+ DSPs through supported distribution partners. Coverage and eligibility vary by store.

SPLITS

Royalty-aware splits

Contributors and percentages recorded up front, so the money knows where to go when it arrives.

SCOPE, STATED PLAINLY

Publishing administration and sync licensing

not included · by design

Masters ownership and royalty share

yours · 100%

Prepare. Check. Deliver. Track.

01

Prepare

Metadata, audio and timing gathered against the store checklists. The Spotify guide spells out each requirement.

02

Check

Release-readiness planning catches the missing ISRC, the wrong sample rate or the too-late release date before a store rejects it.

03

Deliver

Delivery coordinated through supported partners to Spotify, Apple Music and 100+ DSPs.

04

Track

Splits on record, contact by email, and a path to the Suede IP Registry for the rights the distributor never handled.

Guide: distro.suedeai.ai/how-to-upload-music-to-spotify · [Spotify metadata requirements](#) · [audio file requirements](#) · [timing](#)

The file moves. The registry proves who made it.

Distro deliberately leaves rights workflow out of scope, and points at the estate surface built for it. Suede Studio Music keeps the master and 100% of royalties while an idea is being sketched; the Suede IP Registry files the creator claim, the fingerprint, the contributor record and a public timestamp for about a cent in gas.

[STUDIO.SUEDEAI.AI](#)

Own the master

Sketch ideas, remix directions, export stems, keep the masters. Standalone Distro is \$7.99/mo when a track is ready.

[IP.SUEDEAI.AI](#)

Prove the work

Wallet-signed claim, exact-file fingerprint, contributor record, public timestamp on Base and Avalanche.

Create → Prove → Launch → Earn. Distro is the Launch stage.

One number. No percentage. No per-release fee.

SUEDE DISTRO

\$7.99 / month

- Release intake and readiness planning
- Delivery coordination to Spotify, Apple Music and 100+ DSPs
- Royalty-aware splits on record
- Masters and royalties stay yours
- Cancel any time

THE FINE PRINT, IN THE OPEN

Cut of your royalties	0%
Per-release fee	none
Publishing admin, sync	not included
