

Suede Labs AI

SUEDEAI.AI · APP.SUEDEAI.AI · PROOF OF CREATION FOR MUSIC, MEDIA AND LIKENESS

Your work. Your likeness. On the record.

Creator ownership infrastructure for the AI media era: proof of creation, programmable IP, rights metadata, royalty routing and agent commerce. Live on Base mainnet.

The next internet: agentic, creative, owned.

AI systems will create, remix and transact at scale. Without new infrastructure, value is extracted, rights are opaque, and creators are disconnected from the upside. Suede Labs builds the ownership layer: verifiable authorship, machine-readable licenses, rights-aware payments, and distribution paths that route value back to the people who create.

Three curves converging in 2026.

The question is not whether another tool can generate media. It is who owns the rails when that media has to be proven, licensed and paid out.

SUPPLY SHOCK

AI-media volume

Generated media is exploding across every format. Provenance cannot keep up by hand.

NEW BUYERS

Agent commerce

Autonomous agents now pay per call for content and APIs. They need machine-readable rights.

NEW RAILS

On-chain standards

ERC-8004 identity, reputation and validation mature into a usable ownership substrate.

Four stages. One ownership spine.

01

Create

AI lowers the cost of making media of every kind. Suede Create for music and video; Studio Music keeps the master.

02

Prove

Authorship, voice, likeness, consent and rights travel with the work. The Suede IP Registry on Base and Avalanche.

03

Launch

Routes to funding, audience and ownership participation. Distro to 100+ DSPs; vaults and the launchpad.

04

Earn

Payments, vaults, royalties, licensing and agent commerce turn output into income, in USDC, at the moment of use.

Everything downstream settles against the proof layer, and that layer is Suede.

Shipped. Not slideware.

A working product surface at app.suedeai.ai: rights passports, licensing, royalty vaults, an on-chain swap, Suede Create for music and video, and rewards for holding SUEDE. Alongside it, the iOS line: eight apps live on the App Store.

Rights passports

Registry-backed proof of creation attached to every file.

Licensing

Commercial and custom licences, machine-readable, priced in USDC.

Royalty vaults

Artist vaults and participation; settlement routes to contributors.

Suede Create

Generate music and video, refine, and save finished work with ownership metadata.

RIGHTS PASSPORT · ILLUSTRATIVE EXAMPLE

Work	Night Circuit
Proof of creation	sd_9f3a1c
Commercial license	lic_96e2
Payment	\$250.00 USDC
Creator route	\$212.50
Chain	Base mainnet

Own · License · Settle. An on-chain verification workflow, end to end.

The rail agents transact through for IP.

Machine-readable proof of creation and on-chain royalty routing, so autonomous agents can discover, license and pay for creative work. One install, and an agent pays for owned work over x402.

SUEDE CONSOLE

```
$ pip install suede-ai SDK
```

```
suede find --type music --query "cinematic hook" 3 results
```

```
suede license sd_d81e --use commercial --term 3y license created
```

```
suede pay --license settled · USDC
```

- Discover work with verifiable provenance
- Negotiate terms and licenses programmatically
- Execute transactions and settle payments
- Deliver assets and track usage
- Distribute value to contributors

USPTO provisional patent application 63/947,120 · proof of creation and cryptographic media registration

09 — FOUNDER

Jason Colapietro

Founder & CEO, Suede Labs AI. “Johnny Suede.” Two decades chasing guitar tone, then the ownership layer that thinking led to: creation proof, rights metadata, on-chain registration, royalty routing. Author of five books, including Stake Your Claim and Proof as Infrastructure. Solo operator behind the shipped Suede ecosystem.

“The signal chain doesn't end at the speaker. It ends when the royalty clears.”
